Profile

Analytical Insight, Adaptive Learning, Creative Problem Solving, Leadership, Diverse Field Engagement

An ambitious and adaptive student, deeply immersed in the evolving field of Artificial Intelligence. With a proven track record in Saudi Aramco and national arenas like the Robotics Olympiad competition, I demonstrate a high level of adequacy and innovative thinking. Securing excellence awards for three consecutive years further illustrates my commitment to achieving high standards. My two victories in spelling contests not only highlight my precision, but also shows my dedication to excellence in diverse fields. Apart from academic advancements, I have dived into the domain of retail gold selling, which consequently strengthened my communication skills and ability to negotiate.

Professional Experience

Data Scientist Intern

June 2024 – Aug 2024
Dhahran / KSA

Saudi Aramco

Responsible for serving as a crucial mediator between business and development team under Aramco.ai, ensuring technical requirements are understood, gathered, and delivered. Utilizing agile methodology and scrum framework, I was responsible for leading design sprints to gather information and clarify needs, translating them into actionable plans. By collaborating closely with the development team, I ensure the final product meets exceptional standards.

Gold Retail Sales

May 2018 – June 2018
Jeddah / KSA

Mazhar for Gold and Jewelry Company

Responsible for negotiating, selling, and buying gold with a focus on maximizing sales value. Additionally, upon engaging with customers, I maintained strong situational awareness to prevent theft in the store. I closed numerous high-value deals, often worth thousands of dollars. Furthermore, I monitored the gold prices to make informed pricing decisions.
